

CIVIL Department

28th MAY TO 16th JUNE
2019

Field Training

Objectives:

To make the students aware from the fundamentals and working of latest technology with the real working environment we organize every year 15 days field training of 5th & 7th semester students.

This year our total **86** number of students took the training from industry or company. During field training; they learnt overall industrial scenario and technological applications. The field trainings are meant to make the students self-reliant and confident in carrying out various projects in association with respective industries.

Glimpses of the Training

Due to field training, student should understand the role of civil engineer in construction project.

To get knowledge about Map Study, working Diagram.

To get the knowledge about the actual construction work.

To identify the difference between Bookish knowledge and practical knowledge.

To get information about how to execute the paper work in actual field.

Main purpose of this field training is to make student technically sound.
